

ENGINEERING RINOSTEEL SL dedicated to the **design, production, supply and assembly of metal and aluminum products according to the standards UNE-EN-1090 and UNE-EN ISO 3834**, In its eagerness to stay at the forefront compared to its competitors in the metal sector, it has decided to incorporate Design and Development into its already implemented Integrated Management System in accordance with the standards **UNE-EN ISO 9001:2015** (Quality Management System) **UNE-EN ISO 14001:2015** Environmental Commitment and **UNE-EN ISO 45001:2018** (Care and protection of workers).

The main objectives to be achieved with this implementation are as follows:

- Align all company activities and decisions with the goal of achieving customer satisfaction.
- Ensure, by applying the appropriate controls both to the raw materials used and to the finished product, that the delivered orders comply with customer requirements and the applicable legal regulations.
- To be an entrepreneurial organization that avoids bureaucracy and consistently pursues continuous improvement, in order to deliver competitive, high-quality products.
- Ensure that employees are engaged and committed to the quality of the products and services provided by the company, as well as to the protection of the environment and the safeguarding of their health.
- Eliminate hazards and reduce risks to occupational health and safety by establishing a commitment to provide safe and healthy working conditions. The aim is to prevent injuries and health deterioration by allocating resources to first eliminate workplace risks, and where this is not possible, to minimize them to acceptable levels, ultimately protecting employees from existing risks.

To achieve the above, management is committed to allocating the necessary resources, as well as to updating and reviewing its policy whenever deemed appropriate.

The Management of **ENGINEERING RINOSTEEL S.L.** approaches the Integrated Management System as a way to organize the Company's operations, based on fundamental pillars such as product quality, customer satisfaction, continuous improvement of the System's effectiveness, and the care of the natural environment in which its activities are carried out, as well as the health and safety of its employees. To this end, the Integrated Management System of **ENGINEERING RINOSTEEL S.L.** is founded on the following principles:

- Quality, the environment, worker safety, and their continuous improvement are the responsibility of all members of the company, starting with top management.
- Quality, the environment, and the health and safety of workers are achieved by planning, implementing, reviewing, and improving the Management System, always taking into account the organization's internal and external context.
- Quality is focused on the satisfaction of all our customers (and interested parties), through the commitment of the entire organization to meet their needs and requirements, as well as legal and regulatory requirements and those specific to the products.

F-00.04.00 QUALITY POLICY, ENVIRONMENTAL AND SECURITY AND EMPLOYEE'S HEALT

- Quality, the environment, and the health and safety of workers are supported by the continuous improvement of both production and service delivery processes, as well as the effectiveness of the Integrated Management System, in which error prevention is a fundamental aspect.
- Quality drives us to pay the utmost attention to technological developments and the potential improvements offered by new technologies.
- Quality requires the participation and collaboration of everyone, which is why this Policy is communicated to all company personnel for their awareness and understanding.
- The environment requires preventing pollution by identifying, evaluating, and controlling the environmental aspects arising from the organization's activities, prioritizing more environmentally friendly materials, and properly managing the waste generated from our activities.
- The environment requires managing the waste generated as a result of our activities, always complying with legal requirements and, whenever possible, directing it toward reuse, recycling, and recovery operations.
- Project an image externally of the organization as environmentally responsible and focused on improving user satisfaction, for which we will train and raise awareness among personnel on this matter, promoting active participation.
- Provide safe and healthy working conditions to prevent injuries and health deterioration, not only for our own employees but for all stakeholders involved in work under RINOSTEEL's control: clients, employees, and subcontractors.

The main MISSION is to ensure the supply of high-quality metallic and aluminum structural products to our customers in accordance with UNE-EN 1090 and UNE-EN ISO 3834 standards.

Our VISION is to achieve excellence in our services, ensuring that our customers are satisfied before, during, and after the provision of our services.

ENGINEERING RINOSTEEL SL. has as its basic and ongoing priority the continuous improvement of processes, through the pursuit of the highest quality, so that the expectations of CLIENTS and SUPPLIERS are met in all applicable legal requirements regarding the environment and current quality standards, as well as any other requirements undertaken by the company.

For the effective implementation of these principles, the support of both management and staff is absolutely essential.
